

YOUR LIFE IS CALLING™

FOR IMMEDIATE RELEASE

**Wireless Charge and Mount Your Phone in the Car with
PureGear AutoGrip™ Wireless Car Charger**

Self-gripping system and wireless Qi charging means easy phone placement and fast charging

CES 2019 – LAS VEGAS, Nev. – January 7, 2019 – PureGear today announced its new AutoGrip Wireless Car Chargers, so you can enjoy safe, convenient viewing and wireless charging for your smartphone simultaneously. Available as a car vent mount and a dash mount, the AutoGrip features support arms that close automatically when the wireless charging pad senses the Qi-enabled phone.

AutoGrip also comes with a 3 ft. USB-C charging cable as well as a Qualcomm 3.0 car charger.

“The last thing we need while driving is to fumble around with our phones and cables when looking at maps and directions,” said Mike Cavanah, president of PureGear. “The PureGear AutoGrip allows for simple placement of the phone into a dock that closes automatically. There are no charging cables to attach and, with the adjustable support base, no repositioning needed.”

[PureGear AutoGrip Wireless Car Charger – Vent Mount](#)
